

How to Use Fields for Dynamic Content

Dynamic variables are a great way to personalize your message with information you've collected in your DataMart about the user (Name, Address, Recent Purchases, etc.).

This will help you engage your customers on a much more personal level.

1. The ## Tag

- To pull information from the DataMart into your message, it is as easy as placing the "Field Name" in where you would like the information to appear in your template.
- Adding ## in front of and after the Field name to label it as a Dynamic Variable (see example).
- This will work in the subject line as well.

2. Field Names

[Dashboard](#)[Compose](#)[Target](#)[Automate](#)[Deploy](#)[Analyze](#)[Dashboard](#)[FTP imports](#)[Exports](#)[DataMart fields](#)[People](#)[Data extensions](#)[+ Add a new DataMart field](#)[Help with DataMart Fields](#)

Action	Name	Type	Display	Identifier
	Email	Email	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	FirstName	Text	<input type="checkbox"/>	<input type="checkbox"/>
	LastName	Text	<input type="checkbox"/>	<input type="checkbox"/>
	Address	Text	<input type="checkbox"/>	<input type="checkbox"/>
	City	Text	<input type="checkbox"/>	<input type="checkbox"/>
	Province	Text	<input type="checkbox"/>	<input type="checkbox"/>
	PostalCode	Text	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	BirthMonthYear	DateTime	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Birthday	DateTime	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Language	Text	<input type="checkbox"/>	<input type="checkbox"/>
	PreferredStore	Number	<input type="checkbox"/>	<input type="checkbox"/>
	ProductInterest	Text	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	IsPremium	Text	<input type="checkbox"/>	<input type="checkbox"/>
	LoyaltyNumber	Text	<input type="checkbox"/>	<input type="checkbox"/>

To view the available fields in your DataMart and the Field Name that needs to be referenced in your message, follow these steps:

1. Click on the Target Tab
2. Click on the Datamart Fields Button
3. The fields names are located under the Name header.
